Adam Hamdan

About:

Adam Hamdan, the Constitution Party candidate for President, brings an unwavering commitment to God, his country, and the original intent of the United States Constitution as the forefathers intended. Born and raised in Bacon County, Georgia, Hamdan combines his natural rural community values with his extensive legal knowledge as a practicing attorney to conserve the life, liberty, and pursuit of happiness that the Constitution provides. Guided by his faith, Hamdan offers a vision on defending religious freedom, and the power of the American people.

Background:

Following his military service, Hamdan established Hamdan's Law Firm, where he serves as CEO, overseeing legal operations and advocating for constitutional rights. He later entered politics, serving two years as a Georgia State Representative for the 34th District. In 2024, he ran as the Constitution Party's vice presidential candidate, gaining experience in national politics.

Platform

Issue #1: Healthcare

We believe that the government regulated and subsidized healthcare is unconstitutional and threatens both the quality and availability of medical care, treatment and supplies. We support the deregulation of healthcare. “The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.” US Constitution, 10th Amendment.

We believe that if the federal government controls the supply of medical care, the officers of that government will determine the satisfied demand. The result will be the rationing of services, higher costs, poorer results, and the power of life and death transferred from caring physicians to unaccountable political overseers.

Platform

Issue #2: Religious Freedom

We believe every individual has freedom in practicing religion without intervention from the federal government. According to Article 1, Bill of Rights, “Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof…” The Constitution grants no authority to the federal government either to grant or deny the religious expressions of the people in any place.

We believe any form of taxation on churches or other religious organizations is a direct and dangerous step toward state control of the church. Controlling oaths, creeds, membership, volunteers, and employees of private organizations is unconstitutional.

Platform

Issue #3: Money & Banking

We believe the federal government has departed from the principle of "coin" money as defined by the US Constitution. Article 1, Section 8, Clause 5 grants only to Congress the power: "To coin Money [and] regulate the Value thereof", with no provision for such power to be delegated to any other group. Article 1, Section 10: "No State shall … coin Money; emit Bills of Credit; make any Thing but gold and silver Coin a Tender in Payment of Debts".

We believe the Founding Fathers established the system of "coin" money that was designed to prohibit the "improper and wicked" manipulation of the nation's medium of exchange while guaranteeing the power of the citizens' earnings.

Solutions

Healthcare:

We will repeal federal health care law and eliminate the FDA in order to remove federal restrictions on medical treatments, medical devices, pharmaceuticals, allowing individuals to have full access to medical options. The federal government has no Constitutional provision to restrict the freedom of the people to have access to medical care, supplies or treatments.

Religious Freedom:

Protecting the right of private organizations to determine their membership, volunteers, and employment standards based on their oaths and creeds, and repeal any taxes on churches and other religious organizations is our goal. We believe in the First and 10th Amendments which forbid such type of tyranny where the federal government restricted the people's right to practice their own religion.

Money and Banking

Recommending a reform of the system of Federal taxation. In order to do that, the US will return to the money system set forth in the Constitution, repeal the Federal Reserve Act, abolish the Federal Reserve banks and prohibit fractional reserve banking.

Other Issues

#1: Education

The Constitution Party calls upon the legislatures of all fifty states to nullify, reject, and repeal any existing tax funded programs that subsidize private, religious, or home education, and to refrain from enacting any such programs in the future.

#2: Immigration

Call for US troops to protect the states against invasion. All states can and must exercise their sovereign state rights and duties to protect their citizens' property and lives by securing their borders by any means necessary.

#3: Taxes

-

Propose legislation to abolish the Internal Revenue Service and will veto any authorization, appropriation, or continuing resolution that contains any funding for that illicit and unconstitutional agency.

#4: The Natural Family

A stable society depends on the natural family. Children raised by their biological and married parents generally have better outcomes than those who are not. Marriage should be defined by the definition of the one man and one woman standard.

Secure Life, Secure Liberty

First for Freedom

Candidate Adam Hamdan ensures American citizens a life that our Founding Fathers initially planned for us. Bringing back the core values of the US Constitution through the “Secure Life, Secure Liberty” program, we will strictly limit federal overreach, protect individual liberty, restore state sovereignty. By defending constitutional rights and preserving law as it was originally written, this returns power where it rightfully belongs, to the people and their communities.
